DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 7-11 in the reply filed on 7/20/04 is acknowledged. Thus claims 12-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/20/04.

An Office Action on the merits of claims 7-11 as follows:

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the claimed first and second substrate (i.e., see claim 7, lines 2-3) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for

consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed (i.e., method invention).
4. The abstract should be revised to reflect the claimed method.
5. The disclosure is objected to because it does not clearly disclose a first and a second substrate as recited in the claims. At best the specification describes tab tape and a mounting substrate 2 but is in silent of the claimed feature above. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 7-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following are examples:

“said substrate”(claim 7, line 5) lacks proper antecedent basis.

The limitation recites “can be” is not positively limitation.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 7-11 as best understood are rejected under 35 U.S.C. 102(b) as being anticipated by Tsukamoto (5,386,625).

Tsukamoto discloses a method for mounting integrated circuit (IC) on a first substrate comprising steps of connecting one end of a lead provided on a second substrate to an electrode of said IC (see Fig. 2), cutting the lead of said substrate so that a piece of said lead 12a can be left on said electrode of the IC 10 (see the discussion at col. 2, lines 6-22), connecting the piece 12a left on the electrode of said IC to a terminal on said first substrate 14 (see Fig. 2).

As applied to claims 8-9 (see Figs. 5A-B, which shows a decreasing thickness of the lead that substantially set adjacent to the IC chip).

As applied to claims 10-11, Tsukamoto discloses the limitations of claims 10-11 (see the discussion at col. 4, lines 10-14).

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited for their teaching of method for mounting IC on a substrate or the like.
